Product Description

Product Description:

Used 2020 BYD Han DM

The 2020 BYD Han DM is a plug-in hybrid flagship sedan that combines excellent performance, luxurious interior, smart technology and unique design, bringing you an unprecedented driving experience.

Exterior design: majestic and full of oriental charm

- The front face adopts the family-style "Dragon Face" dragon scale grille, and the large-size hexagonal center grille is decorated with rich chrome strips, creating a strong perspective three-dimensional effect, like the scales of a giant dragon, majestic and visually impactful.
- Although the sharp headlight shape is not as slender as the EV version, the lines are sonorous and powerful. The internal matrix layout and blue elements complement each other, highlighting its new energy identity. The "dragon whisker" LED daytime running lights also have intelligent atmosphere lights. When the vehicle is unlocked, it can light up with the car logo, as if the dragon awakens, and the sense of ceremony is overwhelming.
- The side lines are smooth and low, and the fastback roof design is full of dynamism. The distinctive waistline extends from the front fender to the rear door handle. The C-pillar and D-pillar are partially retracted in the car compartment, creating an outward-throwing shoulder, showing the elegant temperament of a high-end car.
- The hidden door handles not only improve the aerodynamic performance of the whole vehicle, but also add a sense of ceremony. The Chinese logo "Han" is engraved on the top, and the details are exquisite.
- The rear design is rich in layers. The through-type taillights are as domineering as dragon claws. The thick chrome strips at the bottom and the "4.7s" zero-hundred acceleration logo always show its powerful performance.

Interior space: luxurious and comfortable, creating an exclusive driving experience

- The interior is carefully created by former Mercedes-Benz designer Michele Pagani, and the wrap-around cockpit design brings a strong sense of integrity. The center console is delicately connected with the door, and the air outlets extending forward on both sides create a good sense of depth. The horn shape on the door panel is concave, which blends naturally with the overall design.
- In terms of materials, it uses a combination of light beige leather, light gray solid wood and black piano paint. Both the color and texture exude the quality of a luxury car.
- The seats are wrapped in Nappa leather, and the diamond stitching adds a sense of luxury. The seats are full of fillings, the cushions are sufficiently supportive, and have good side support. The front seats are also equipped with heating and ventilation functions, bringing the ultimate comfort to the driver and passengers.
- The interior space is spacious, the body size reaches 4960*1910*1495mm, the wheelbase is 2920mm, and the legroom in the back row is ample. Even if 3 adults are sitting, they will not feel crowded, and the middle backrest is more comfortable.

Power performance: powerful and fast, passionate driving at will

- The 2020 BYD Han DM adopts a dual-engine four-wheel drive system, equipped with a 2.0T engine and a rear motor. The engine has a maximum power of 192 horsepower, the electric motor has a maximum power of 244 horsepower, and a peak torque of 330 Nm. The system's comprehensive maximum power is 436 horsepower and a peak torque of 650 Nm.

Features:

1.Product Name: Used BYD Han DM

Safety:

Comprehensive safety airbag system for passenger protection
Advanced safety technologies including ABS (Anti-lock Braking System), Electronic Stability Control, etc., for stable driving and braking performance
